**Office Memorandum • UNITED STATES GOVERNMENT**

TO : Files, Contract No [ ] , Task Order No. 2 DATE: 15 April 1953 50X1

FROM : [ ] 50X1

SUBJECT: Conference with [ ] on the URP-11 50X1

1. A conference was held in Washington, D.C., on 2 April 1953, with [ ] 50X1  
for the purpose of discussing the URP-11 Thermoelectric Generator program.  
Those present were:

50X1

2. In accordance with the directive of the Research and Development Board, the Contractor was queried as to the feasibility of constructing a single model of the URP-11 without the benefit of the extended study program which he had requested. It was determined that the cost for constructing a single model would be approximately \$50,000 and that the performance characteristics of this model could not be accurately predicted at this time.

3. It was decided that as a means of terminating this program, it would be most desirable to request the Contractor to prepare a complete paper design of a working model based upon his present knowledge, and to provide information as to the expected performance characteristics of such a model. The possession of this information would provide a convenient starting point for any subsequent re-activation of the program, should the requirements and needs of this Agency so dictate.

4. [ ] estimated that an additional \$5,000 would be necessary to 50X1  
carry out this paper design. However, it was agreed that [ ] would prepare a 50X1  
technical proposal and cost estimate at once and submit it formally to this  
Agency through the Contracting Officer. The funds which were originally  
authorized for this program have been completely expended. It will therefore  
be necessary to request additional development funds to cover this final portion  
of the program.
